

SPSE Jecna Test Case

Test Case ID: T_4	Test Designed by: Filip Heger
Test Name: Verify functionality of series importing	
Brief description: Testing that the application loads and imports series successfully	
Pre-conditions: Success in T_1 and T_2	
Dependencies and Requirements: Windows OS	

Step	Test Steps	Test Data	Expected Result	Notes
1	Run the application, enter the cli		The application opens without issue	You may optionally run Help to accustom yourself with the available commands
2	Run the ImportSeries command	Path of the imported file, in the release there is a samples/series_import.json	The Program successfully signals that data has been imported (the sample is named breaking bad)
